

Simon Wehrli

Software engineer & Trainer

I'm a visionary for software engineering and a pragmatist in writing code. I love teaching how I build stuff with the click-clacks of my keyboard because I'm talented in explaining. If a culture of conveying know-how to team mates prevails, even complex software projects will succeed.

Work Experience

Software Engineer

Self-employed | Lisbon | 2020 - 2021

I built my own SaaS for events & marketing automation.

Software Engineer | Full stack development & DevOps

freiheit.com technologies gmbh | 2017 - 2020

I contributed to the full stack of a system for a large German grocery chain:

- Ownership of Golang microservices and custom authorization scheme
- Custom mobile app for merchandise management with offline functionality

In my first project we built a platform for car entertainment:

- Golang microservices, external API consolidation, advanced testing/monitoring
- Mentoring new hires and building first international hub in Lisbon

Internship

Ergon Informatik AG | Switzerland | 2014 (7 months)

Interactive visualization of telecommunication products with Java.

Academic History

ETH Zurich

MSc., Computer Science

I specialized in distributed systems and programming methodology.

[My Master Thesis](#) about a static analyzer was awarded with the best possible grade.

Voluntary work

tanzquotient.org | 2014 - 2017

I helped the students association to scale dance classes to thousands of participants every year by digitizing all repetitive processes:

- Customized Django application with PostgreSQL
- Asynchronous E-Mail marketing & course notifications
- Online course payments scaled to 80'000€ annual gross revenue
